Adenocarcinoma, Endometrioid, NOS 8380/3 12/9/10

Surgical Pathology

Site Code: Endometrium

TISSUE DESCRIPTION:

A1 B1 B2 B3 B4 B5 B6 B7 B8 B9 B10 B11 C1 C2 C3 C4 C5 D1 D2

D3 D4 D5 D6 E1 E2 E3 E4 E5

Uterus, right ovary $(2.0 \times 1.5 \times 0.9 \text{ cm})$ with 5.9 cm segment of

right fallopian tube, and left ovary $(1.9 \times 1.8 \times 0.9 \text{ cm})$ with 7.3

cm segment of left fallopian tube together weighing 95.0

separately submitted tissue from the pelvic peritoneum (biopsy, 1.4

x 1.0 x 0.2 cm), right and left pelvic lymph nodes and left

para-aortic nodes.

DIAGNOSIS:

Uterus, bilateral ovaries, and fallopian tubes; total abdominal

hysterectomy and bilateral salpingo-oophorectomy: Invasive FIGO

grade I (of III) endometrial adenocarcinoma, endometrioid type

forming a mass $(8.5 \times 2.6 \times 1.1 \text{ cm})$ invading 0.7 cm into the 1.8 cm

myometrial thickness. Tumor locally involves the lower uterine

segment. The cervix is uninvolved.

Ovary, right, oophorectomy: Focus of endometriosis.

Ovary, left, oophorectomy: Without diagnostic abnormality.

Fallopian tubes, right and left, salpingectomies: Without diagnostic abnormality.

Soft tissue, pelvic peritoneum, biopsy: Inflamed fibroconnective tissue.

Lymph nodes, right pelvic, lymphadenectomy: Multiple (11 external

iliac, 4 common iliac, 1 internal iliac and 3 obturator) are negative for tumor.

Lymph nodes, left pelvic, lymphadenectomy: A single left pelvic obturator (of 9) is positive for metastatic adenocarcinoma. Multiple (1 external iliac, 4 common iliac, 1 internal iliac) are negative for tumor.

Lymph nodes, left para-aortic, lymphadenectomy: Multiple (8) left para-aortic lymph nodes are negative for tumor.
